Product Removal:

Products shall be removed from the approved list for the following reasons:

1. Product does not perform in the field.
2. Randomly tested material fails laboratory testing.
3. Product composition changes without prior notification.

Standard Specifications for Road and Bridge Construction Section 1080.04 (current year issued)  
Material Code: 56215

**Submittal for Testing and Approval**

**A. Scope**

Before materials can be used for a Department project, the manufacturer/supplier must have a producer/supplier number assigned to their facility. The following guidelines are provided to clarify the submittal requirements and expedite the process.

**B. Procedure**

When requesting producer/supplier status with the Department, the following shall be included in the certification:

- Manufacturer name and internet address (if applicable),
- The specific product brand name, (if private label must provide original product name)
- Material Safety Data Sheet (if applicable),
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department, and
- Contact person's name, title, address, email address, and phone number.
- [Acknowledgment by Company \(Form BMPR 101\)](#). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgment by Company form with your product submittal.

Depending on the material, test samples may be required to obtain a producer/supplier number. Please contact [Tom Sonnek](#) at (217) [782-4666](#) for sample size as sizes vary depending on the material type. The sample and certification shall be sent to:

Illinois Department of Transportation  
Bureau of Materials  
Attn: Tom Sonnek  
126 East Ash Street  
Springfield, IL 62704-4766

Any sample provided without the required information listed will not be tested. Any changes outside the manufacturer's original parameters will necessitate a new sample submittal.

Submitted materials will be tested according to the Department's current edition of the Standard Specifications for Road and Bridge Construction.

**C. Recertification**

Annual recertification for various materials is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due by mid-January of the following year. The recertification process assures the manufacturer that his/her product will remain on the approved list for a period of one calendar year.

The manufacturer will be notified when the sample testing is complete. For questions regarding the testing and approval process, contact [Tom Sonnek](#) at (217) [782-4666](#).
