Product Removal:

Products shall be removed from the approved list for the following reasons:

1. Product does not perform in the field.
2. Randomly tested material fails laboratory testing.
3. Product composition changes without prior notification.

**Submittal for Testing and Approval**

**A. Scope**

Before materials can be used for a Department project, the manufacturer/supplier must have a producer/supplier number assigned to their facility. The following guidelines are provided to clarify the submittal requirements and expedite the process.

**B. Procedure**

When requesting producer/supplier status with the Department, the following shall be included in the certification:

- Manufacturer name and internet address (if applicable),
- The specific product brand name, (if private label must provide original product name)
- Material Safety Data Sheet (if applicable),
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department, and
- Contact person's name, title, address, email address, and phone number.
- Acknowledgment by Company (Form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgment by Company form with your product submittal.

Depending on the material, test samples may be required to obtain a producer/supplier number. Please contact Tom Sonnek at (217) 782-4666 for sample size as sizes vary depending on the material type. The sample and certification shall be sent to:

Illinois Department of Transportation  
Bureau of Materials  
Attn: [Michael Aldridge](#)  
126 East Ash Street  
Springfield, IL 62704-4766

Any sample provided without the required information listed will not be tested. Any changes outside the manufacturer's original parameters will necessitate a new sample submittal.

Submitted materials will be tested according to the Department's current edition of the Standard Specifications for Road and Bridge Construction.

**C. Recertification**

Annual recertification for various materials is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due by mid-January of the following year. The recertification process assures the manufacturer that his/her product will remain on the approved list for a period of one calendar year.

The manufacturer will be notified when the sample testing is complete. For questions regarding the testing and approval process, contact [Michael Aldridge](#) at (217) 558-2091.
