Qualified Producer List  
**CERTIFIED ASTM A706 REINFORCING BAR AND/OR DOWEL BAR**  
September 08, 2023

This list supersedes the May 26, 2023 list.

Standard Specifications for Road and Bridge Construction and Bridge Construction Articles 1006.10 and 1006.11(current year issued)

**Section 1006: Metals**

**1006.10 Reinforcement Bars, Welded Reinforcement, and Prestressing Steel Strand**

**(a) Reinforcement Bars**

**1006.11 Pavement Longitudinal Metal Joints, Dowel Bars, and Dowel Bar Assemblies**

**(b) Dowel Bars**

**INSTRUCTIONS FOR IDENTIFICATION OF REINFORCEMENT BAR MARKINGS**

The specifications for deformed steel bars for concrete reinforcement (ASTM A706) requires identification marks to be rolled into the surface of one side of the bar to denote the producer's mill designation, bar size, type of steel, and minimum yield strength. Markings are usually provided in the following order.

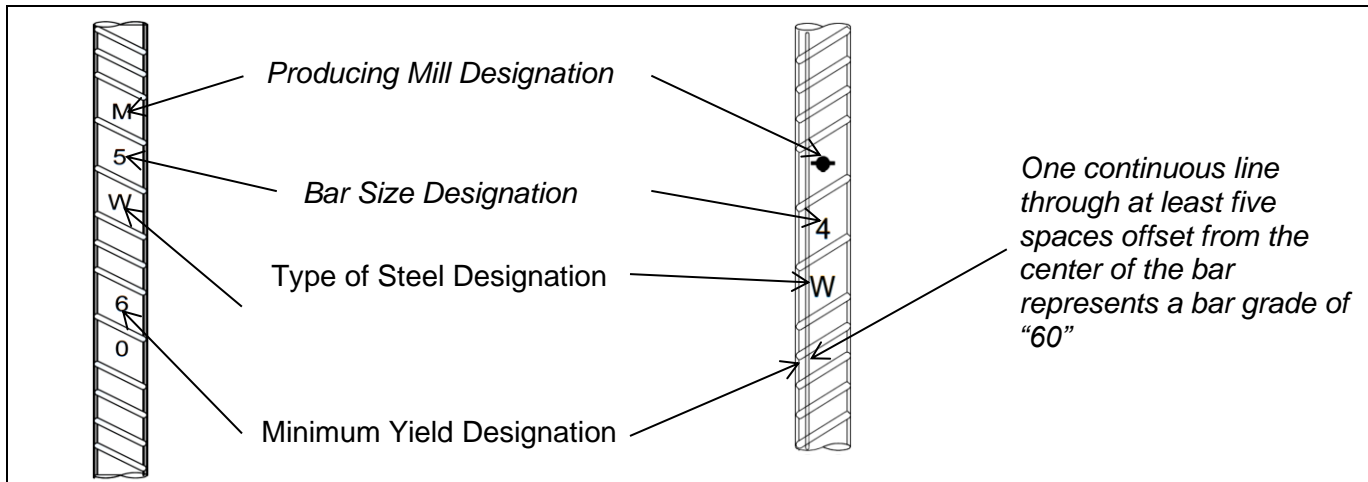

1st - Producing Mill (usually an initial)

2nd - Bar Size Number #3 - #11, #14, and #18

3rd - Type Steel: **W** = Weld-able Steel (ASTM A706); **SW** = Dual Grade (ASTM A615/ASTM A706)

4th - Minimum yield strength designation

For Grade 60 the bars must show the minimum yield strength designation, a grade mark of either the number "60" or one grade mark line continued for at least five deformation spaces. A grade mark line is smaller and between the two main ribs, this grade mark can be on the opposite side of the bar.

Note: The approval process is outlined in Policy Memorandum 26-08 titled "[Reinforcement Bar and/or Dowel Bar Plant Certification Procedure.](#)"

**Illinois Department of Transportation  
Bureau of Materials**

**(b) Dowel Bars**

Domestic Steel Act Applies:

All iron and steel products, which are to be incorporated into state projects shall be domestically manufactured or produced and fabricated. The Contractor shall obtain from the iron or steel producer and/or fabricator, in addition to the mill analysis, a certification that all iron or steel materials meet these domestic source requirements. The application of all coatings, epoxy, galvanizing, painting, etc., to metal products shall be domestically applied.

**Submittal for Testing and Approval**

**A. Scope**

Before materials can be used for a Department project, the manufacturer/supplier must have a producer/supplier number assigned to their facility. The following guidelines are provided to clarify the submittal requirements and expedite the process.

**B. Procedure**

When requesting producer/supplier status with the Department, the following shall be included in the certification:

- Manufacturer name and internet address (if applicable),
- The specific product brand name, (if private label must provide original product name)
- Safety Data Sheet (if applicable),
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department, and
- Contact person's name, title, address, email address, and phone number.
- Acknowledgement by Company (Form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgement by Company form with your product submittal.

Depending on the material, test samples may be required to obtain a producer/supplier number. Please contact Tom Sonnek (217) 782-4666 for sample size as sizes vary depending on the material type. The sample and certification shall be sent to:

Illinois Department of Transportation  
Bureau of Materials  
Attn: Tom Sonnek  
126 East Ash Street  
Springfield, IL 62704-4766

Any sample provided without the required information listed will not be tested. Any changes outside the manufacturer's original parameters will necessitate a new sample submittal.

Submitted materials will be tested according to the Department's current edition of the Standard Specifications for Road and Bridge Construction.

**C. Certification/Recertification**

Reinforcement Bar and/or Dowel Bar Plant manufacturers are certified/recertified in accordance with [Policy Memorandum 26-08](#).
